Bertke Publications, United States, 2014. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Since Erwin Schrodinger developed his probability theory, physics has been lost in an increasingly complex mathematical world of multiple dimensions and parallel universes. The authors propose a simple solution that explains ALL forms of energy and matter with just one particle, The Only Needed (TON) Particle, and two well-known and documented forces. This book provides measurable and predictive cause and effect solutions for everything from sub-atomic structures to the universe at large. Along the way, the theory answers questions about star formation, nuclear fusion and fission, and how all our atomic elements are formed. The TON Particle Theory is completely compatible with existing documentation on electricity, magnetism, and thermodynamics. It explains dark matter, proves that all forms of vibrating energy have mass, and resolves the question of entropy. Although written for the non-scientist, the book also contains the mathematical proofs for the scientist.
