Eisenhower National Historic Site and Gettysburg National Military Park: Weather of 2009

By National Park Service

CreateSpace Independent Publishing Platform. Paperback.

Book Condition: New. This item is printed on demand.

Paperback. 28 pages. Dimensions: 11.0in. x 8.5in. x

0.1in. Weather and climate are widely recognized as key drivers of terrestrial and aquatic ecosystems, affecting biotic as well as abiotic ecosystem characteristics and processes. Global and regional scale climatic patterns, trends, and variations are critical to the cycling of elements, nutrients, and minerals through the ecosystems and can deliver pollutants from regional and even global sources. These variations and trends influence the fundamental properties of ecologic systems such as soil-water relationships, and plant-soil processes and their disturbance rates and intensity. Information obtained from meteorological monitoring will be useful to interpreting and understanding changes in species composition, community structure, water and soil chemistry, and related landscape processes. This item ships from La Vergne, TN. Paperback.

Reviews

It is one of the most popular publications. It is actually written in easy words instead of confusing. You will like how the author created this book.

-- **Art Gislason**

A very awesome publication with perfect and lucid information. It is probably the most awesome book I have read. You may like how the author published this pdf.
